Mrs. C., though girlish looking and only thirty-one years old, has had more than her share of trouble. Two and a half years ago her husband died from tuberculosis, leaving her with six children, of whom the oldest is thirteen and the youngest three and a half. By working as a janitor the mother reduces the rent to \$5 a month. The church helps and she earns a little taking in washing, but \$5 more a week is needed besides the balance of the rent and a daily supply of milk—about \$35 a month in all.
